

# MGM INSTITUTE OF HEALTH SCIENCES

Accredited by NAAC with 'A' Grade

(Deemed University u/s 3 of UGC Act, 1956)

Sector-01, Kamothe, Navi Mumbai - 410 209

Tel 022-27432471, 022-27432994, Fax 022 - 27431094

E-mail : [registrar@mgmuhs.com](mailto:registrar@mgmuhs.com) ; Website : [www.mgmuhs.com](http://www.mgmuhs.com)

## CHOICE BASED CREDIT SYSTEM (CBCS)

(With effect from 2019-20 Batches)

### Curriculum for M.Sc. Medical Physiology

Approved as per [Resolution No. 3.2.1.6.i] of BOM -57/2019, Dated 26/04/2019

Approved as per [Resolution No. 3.1.1.4] of BOM-59/2019, dated 11/11/2019

Approved as per [Resolution No. 3.2.1.5] of BOM-62/2020, dated 16/09/2020

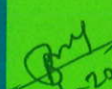

Approved as per [Resolution No. 3.2.1.6] of BOM-62/2020, dated 16/09/2020

&

Post facto approval will be accorded to certain changes by AC-39/2021 & BOM-63/2021

  
Dr. Rajesh B. Goel  
Registrar

MGM Institute of Health Sciences  
(Deemed University u/s 3 of UGC Act, 1956)  
Navi Mumbai- 410 209

  
11-1-2021

**LEARNING OUTCOME BASED CURRICULAM FRAMEWORK**

**MSc. Medical Physiology Course**

Sr. No.		
1	Objectives	<ul style="list-style-type: none"> <li>• <b>Learning Objectives No.1 : Acquisition of Knowledge</b>                      A post graduate student upon successfully qualifying in the M.Sc Medical physiology examination should be able to :                     <ol style="list-style-type: none"> <li>1. Understand and deal with all aspects of general, systemic and applied Physiology.</li> <li>2. Teach effectively the basic physiological mechanisms of human body with reference to their implications in the pathogenesis of diseases (pathophysiology) affecting various organ systems and the physiological basis of their management to undergraduate medical, paramedical and all other basic science students.</li> <li>3. Understand general principles of medical education (use of appropriate teaching techniques and resources).</li> <li>4. Interpret and evaluate research publications critically.</li> <li>5. Use the library facilities (Literature database using computer, CD ROM, internet search and any other available newer techniques).</li> <li>6. Conduct relevant research which may have significant bearing on human health and patient care.</li> <li>7. Interpret the research findings in the light of its basic and applied significance.</li> <li>8. Acquire skills in conducting collaborative research in the field of physiology with allied sciences, clinical sciences and biomedical engineering.</li> <li>9. Interact with the allied departments and render services in advanced laboratory investigations.</li> <li>10. Acquire administrative skills to set up concerned department / laboratories</li> <li>11. Function as a member of a teaching or research team.</li> </ol> </li>   <li>• <b>Learning Objectives No.2 : Teaching and Training</b>                      The student should be able to effectively teach the basic physiological mechanisms of human body with reference to their implications in the pathogenesis of diseases (pathophysiology) and their management to undergraduate students in medicine (MBBS) and allied health science courses (Dentistry, Nursing, Physiotherapy, BSc.allied sciences).</li> </ul>

		<p>Plan, execute and evaluate teaching assignments in Medical Physiology.</p> <p>Conduct research. Participate actively in various workshops/seminars/journal clubs/demonstration in the allied departments, to acquire various skills for collaborative research.</p> <ul style="list-style-type: none"> <li>• <b>Learning Objectives No.3 : Research</b> The student should be able to carry out a research project (both basic and clinical) from planning to publication and be able to pursue academic interests and continue life-long learning to become more experienced in all the above areas .</li> </ul>
2	Generic Graduate Attributes	<p><b>Scholarly Attitude :</b> At the end of the course the student shall be able to:</p> <ol style="list-style-type: none"> <li>1. Conduct experiments designed for study of physiological phenomena.</li> <li>2. Interpret experimental/ investigate data.</li> <li>3. Distinguish between normal and abnormal data derived as a result of tests which he/she has performed and observed in the laboratory</li> </ol> <ul style="list-style-type: none"> <li>• Encouraged to participate in seminars ,workshop, conferences/CME.</li> </ul> <p><b>Research Aptitude :</b></p> <ul style="list-style-type: none"> <li>• Encouraged to apply for research funding, ICMR Fellowship</li> <li>• Research Methodology training programs</li> <li>• Plan, execute, analyze and present the research work in Medical Physiology at various conferences.</li> <li>• Encouraged to write papers and publish them in Indexed journals.</li> </ul> <p><b>Exemplary Leadership</b></p> <ul style="list-style-type: none"> <li>• Organizes/ helps in organizing various conferences, CMEs and workshops</li> <li>• Organizes cultural festivals, Annual fest Student magazines</li> </ul>
3	Desired Learning Outcomes of Degree	<p><b>Element of Critical thinking</b> In addition to didactic lectures to provide a holistic education students are exposed to the following teaching-learning practices/programs</p> <ul style="list-style-type: none"> <li>• Journal Clubs</li> <li>• Slide discussions</li> <li>• Seminars</li> <li>• Participate in workshop, conferences/CME.</li> </ul>

		<p><b>Dynamic Professionalism</b></p> <ul style="list-style-type: none"> <li>Encouraged to participate in various conferences, CMEs and workshops and do paper presentations (Oral/Poster).</li> </ul>
4	Proportion of knowledge / Skill / Soft Skill in Curriculum	<p><b>Knowledge</b> Understand and Teach all aspects of general, systemic and applied human body Physiology.</p> <p><b>Skills</b> Haematology practicals, amphibian &amp; mammalian experiments, human experiments, Clinical examination of various systems.</p> <p><b>Soft skills</b> Effective Communication Skills</p> <ul style="list-style-type: none"> <li>Microteaching</li> <li>Formative and summative assessment of Communication and teaching skills in the form of Microteaching &amp; seminar presentations</li> </ul>
5	Curriculum and Employability	<p><b>Global Competencies :</b> Teaching Medical Physiology Research Physiological laboratories(PFT, ECG,NCV) Yoga Exercise Physiology Food &amp; nutrition</p>

## **Name of the Degree: M.Sc. MEDICAL PHYSIOLOGY**

### **AIMS OF THE PROGRAM**

Physiologists in demand in today's Sports, Yoga & nutrition fields in India & abroad

A Physiology Postgraduate has a career as teaching faculty with research aptitude and ability of applying physiology to clinical fields.

Postgraduate qualification Physiology can earn to placements in Medical teaching institute, research laboratories run by the government and the corporate sector. Private sector placements are in teaching, technical and managerial positions. The demand is growing at an accelerated rate, which makes career prospects in this field bright.

In academics, one can go for higher qualifications like Ph.D. in various field of Physiology. There is a great demand of this course abroad as most of the foreign countries are looking for expert in this field. After completion of the course, one can work as Tutor or Medical Physiologist in a Medical set up or as a Research Associate in Research Laboratories, also as Exercise Physiologist-Training of sports people, Nutrition Physiologist: Sensory – metabolic interactions in control of food intake, ontogeny of food habits and food preferences & As researcher in yoga :Stress, life style and its impact on mind body interactions.

**Duration of Study:** The duration of the study for M.Sc. Medical Physiology will be of six semesters spread over three years.

### **Program pattern- Commencement of Semester**

- First Semester: August
- Second Semester: February
- Third Semester: August
- Fourth Semester: February
- Fifth Semester: August
- Sixth Semester: February

**Eligibility Criteria:** As a minimum criterion of eligibility, aspiring candidates are needed to have attained a B.Sc. in any discipline of Life Sciences, Biosciences, Bachelor's degree in any of Physics, Biological Sciences, M.B.B.S, BDS, BAMS, BHMS, B.Pharm., Bachelor's Degree in Agricultural, Veterinary and Fishery Sciences, or equivalent examination with a minimum aggregate score of 50%.

**For any query visit the website: [www.mgmuhs.com](http://www.mgmuhs.com)**

		<b>Total</b>	23	46	40	260	300

**\*Exam to be taken at Departmental Level**

SEMESTER VI							
	Syllabus Ref. No.	Subject	Credits	Teaching hours	Marks		
	Theory				Internal Assessment	Semester Exam	Total
	MP601T	Central Nervous system Special senses	4	4	20	100	120
	MP602	Clinical Postings	5	15		20*	20
	MP603	Seminar/Journal Club	1	1		20*	20
	<b>Practical</b>						
	MP601P	<b>Clinical examination in :</b> Central Nervous system Special senses	2	4	20	50	70
	MP602P	<b>Dissertation/ Project**</b>	12	24		70	70
		<b>Total</b>	24	48	40	260	300

\*Exam to be taken at Departmental Level

\*\***(a) Dissertation / Project Course commences in II nd Semester.**

Students should undergo ICMR Online Course of Research Methodology before submitting the protocol for their Dissertation. ( Ist / II nd Semester)

Allotment of Guide	II <sup>nd</sup> Semester ( On or Before 30 April )
Submission of Protocol for Scientific and Ethical Committee Approval	III <sup>rd</sup> Semester ( On or Before 14 <sup>th</sup> Aug )
Scientific and Ethical Approval	III <sup>rd</sup> Semester ( On or Before 14 <sup>th</sup> October)
Commencement of Research Work	III <sup>rd</sup> Semester 15 <sup>th</sup> October
Submission of Thesis	VI <sup>th</sup> Semester 31 <sup>st</sup> March

\*\*\* **(Elective): Any one subject is to be chosen from the subjects offered** (Subjects offered may change from time to time depending on the availability of expertise)

**Elective courses may or may not have practical and/or field work.**

**Annexure – G – IIa**

**ACADEMIC SYLLABUS FOR SEMESTER-I**

Name of the Programme	<b>M. SC MEDICAL PHYSIOLOGY</b>
Name of the Course	<b>PHYSIOLOGY Part1</b>

<b>Course Objective ( Teaching Objectives)</b>	<ul style="list-style-type: none"><li>• To teach basic physiological concepts related to General Physiology, Haematology, Nerve Muscle Physiology, Respiratory and Cardiovascular physiology</li></ul>
<b>Course Outcomes ( learning Objectives)</b>	<ul style="list-style-type: none"><li>• To understand the basic physiological concepts of General physiology</li><li>• To understand the basic physiological concepts of Haematology,</li><li>• To understand the basic physiological concepts of Nerve Muscle Physiology,</li><li>• To understand the basic physiological concepts of Respiratory physiology</li><li>• To understand the basic physiological concepts of Cardiovascular physiology</li></ul>

<b>Unit no.</b>	<b>Theory Topics</b>	<b>Hours allotted No. of 45hrs</b>
<b>1.</b>	<b>General Physiology</b> <ul style="list-style-type: none"><li>• Homeostasis, feedback mechanisms</li><li>• Structure &amp; function of cell &amp; organelles</li><li>• Transport across Cell Membrane</li></ul>	<b>4 hrs</b>
<b>2.</b>	<b>Hematology</b> <ul style="list-style-type: none"><li>• Composition &amp; functions of blood, plasma protein</li><li>• RBC, Erythropoiesis</li><li>• Haemoglobin, Anaemia</li><li>• Blood Groups</li><li>• WBC</li><li>• Immunity</li><li>• Haemostasis</li><li>• platelets</li><li>• Coagulation of blood</li><li>• Lymph, reticuloendothelial / Tissue Macrophage System</li></ul>	<b>10 Hrs</b>
<b>3.</b>	<b>Nerve Muscle Physiology</b> <ul style="list-style-type: none"><li>• Structure, function &amp; classification of Nerve Fibres</li><li>• Properties of Nerve Fibres</li><li>• Resting membrane Potential, Action Potential</li><li>• Neuromuscular Junction</li><li>• Structure of skeletal muscle</li><li>• Mechanism of muscle contraction, Excitation Contraction coupling</li><li>• Properties of skeletal muscle</li></ul>	<b>8 Hrs</b>

4.	<b>Respiratory System</b> <ul style="list-style-type: none"> <li>• Introduction, physiological anatomy &amp; Functions of RS</li> <li>• Lung volume &amp; capacities</li> <li>• Mechanism of breathing</li> <li>• Diffusion</li> <li>• Transport of O<sub>2</sub></li> <li>• Transport of Co<sub>2</sub></li> <li>• Neural Regulation</li> <li>• Chemical regulation</li> <li>• Hypoxia</li> </ul>	<b>10 Hrs</b>
5.	<b>Cardiovascular system</b> <ul style="list-style-type: none"> <li>• Introduction – functional anatomy, structure of cardiac muscle</li> <li>• Properties of cardiac muscle</li> <li>• Cardiac impulse</li> <li>• ECG</li> <li>• Cardiac cycle</li> <li>• Cardiac output</li> <li>• CVS regulation</li> <li>• Heart Rate</li> <li>• Blood Pressure</li> <li>• Hemodynamics</li> <li>• Coronary circulation</li> </ul>	<b>13 Hrs</b>
	<b>Total</b>	<b>45 HRS</b>

<b>Unit no.</b>	<b>Tutorial Topics</b>	<b>Hours allotted No. of 15hrs</b>
1.	Transport of cell	1
2.	Erythropoiesis	1
3.	Blood Groups	1
4.	Resting membrane potential & Action Potential	1
5.	Hemostasis	1
6.	Immunity	1
7.	E-C coupling & Mechanism of contraction	1
8.	Mechanism of breathing	1
9.	Neuromuscular Junction	1
10.	Transport of O <sub>2</sub> & CO <sub>2</sub>	1
11.	Regulation of respiration	1
12.	Cardiac impulse	1
13.	ECG	1
14.	Cardiac output	1
15.	Blood pressure & its regulation	1
	<b>Total</b>	<b>15hrs</b>

<b>Unit no.</b>	<b>Practical Topics</b>	<b>Hours allotted No. of 30 hrs</b>
<b>1.</b>	<b>Haematology</b> 1. Microscope, collection of blood 2. smear preparation 3. Haemoglobin 4. Total Leukocyte count 5. RBC count 6. DLC 7. BT & CT 8. Blood Group	<b>19hrs</b>
<b>2.</b>	<b>Clinical</b> 1. General Physical Examination 2. Pulse 3. Blood pressure	<b>7 Hrs</b>
<b>3.</b>	<b>Human Experiments</b> 1. Spirometry 2. ECG	<b>4Hrs</b>
	<b>Total</b>	<b>30 HRS</b>

MGM INSTITUTE OF HEALTH SCIENCES			
M. Sc. Medical Students			
Syllabus for Research Methodology and Biostatistics			
		No. of Hours	
<b>I. Research Methodology:</b>		Theor y	Practica l
<b>Scientific Methods of Research :</b> Definition of Research, Assumptions, Operations and Aims of Scientific Research. Research Process, Significance and Criteria of Good Research , Research Methods versus Methodology, Different Steps in Writing Report, Technique of Interpretation, Precaution in interpretation, Significance of Report Writing, Layout of the Research Report		5	—
<b>Research Designs:</b> Prospective, retrospective, Observational Studies: Descriptive, explanatory, and exploratory, Experimental Studies: Pre-test design, post-test design, Follow-up or longitudinal design, Cohort Studies, Case Control Studies, Cross sectional studies, Intervention studies, Panel Studies.		5	—
<b>Sampling Designs :</b> Census and Sample Survey, Implications of a Sample Design, Steps in Sampling Design Criteria of Selecting a Sampling Procedure, Characteristics of a Good Sample Design, Different Types of Sample Designs (Probability sampling and non probability sampling), How to Select a Random Sample?, Systematic sampling, Stratified sampling, Cluster sampling, Area sampling, Multi-stage sampling, Sampling with probability proportional to size, Sequential sampling.		4	0
<b>Measurement in research:</b> Measurement Scales, Sources of Error in Measurement, Tests of Sound Measurement, Technique of Developing Measurement Tools, Scaling Meaning of Scaling, Scale Classification Bases, Important Scaling Techniques, Scale Construction Techniques, Possible sources of error in measurement, Tests of sound measurement		5	5
<b>Methods of Data Collection:</b> Types of data, Collection of Primary Data, Observation Method, Interview Method, Collection of Primary Data		3	0
<b>Ethics and Ethical practice in research and plagiarism</b>		1	
<b>Sampling Fundamentals :</b> Need and importance for Sampling, Central Limit Theorem, Sampling Theory, Concept of Standard Error, Estimation, Estimating the Population Mean Estimating Population Proportion, Sample Size and its Determination, Determination of Sample Size through the Approach Based on Precision Rate and Confidence Level.		5	2
<b>II. Biostatistics</b>			

<b>Data Presentation</b> : Types of numerical data: Nominal, Ordinal, Ranked, Discrete and continuous. Tables: Frequency distributions, Relative frequency, Graph: Bar charts, Histograms, Frequency polygons, one way scatter plots, Box plots, two way scatter plots, line graphs	3	3
<b>Measures of Central Tendency and Dispersion</b> : Mean, Median, Mode Range, Inter quartile range, variance and Standard Deviation, Coefficient of variation, grouped mean and grouped standard deviation (including merits and demerits).	3	3
<b>Testing of Hypotheses:</b> Definition, Basic Concepts, Procedure for Hypothesis Testing, Normal distribution, data transformation Important Parametric Tests, Hypothesis Testing of Means, Hypothesis Testing for Differences between Means, Hypothesis Testing for Comparing Two Related Samples, Hypothesis Testing of Proportions, Hypothesis Testing for Difference between Proportions, Testing the Equality of Variances of Two Normal Populations.	6	6
<b>Chi-square Test:</b> Chi-square as a Non-parametric Test, Conditions for the Application Chi-square test, Steps Involved in Applying Chi-square Test, Alternative Formula, Yates' Correction, and Coefficient by Contingency.	2	2
<b>Measures of Relationship:</b> Need and meaning, Correlation and Simple Regression Analysis	2	2
<b>Analysis of Variance and Covariance:</b> Analysis of Variance (ANOVA): Concept and technique of ANOVA, One-way ANOVA, Two-way ANOVA, ANOVA in Latin-Square Design Analysis of Co-variance (ANOCOVA), ANOCOVA Technique.	4	4
<b>Nonparametric or Distribution-free Tests:</b> Important Nonparametric or Distribution-free Test Sign test, Wilcoxon signed-Rank Test, Wilcoxon Rank Sum Test: Mann-Whitney U test Kruskal Walli's test, Friedman's test, and Spearman Correlation test.	3	3
<b>Vital Health Statistics:</b> Measurement of Population: rate, crude rate, specific rate, <i>Measurement of fertility:</i> specific fertility rate, Total fertility rate, <i>Reproduction rate,</i> Gross Reproduction Rate, Net Reproduction Rate, Measures related to mortality: Crude Death Rate (CDR) , Age-specific death Rate, Infant and child mortality rate, Measures related to morbidity.	4	3
<b>Computer Application</b> Use of Computer in data analysis and research, Use of Software and Statistical package.	0	2
<b>Total hours</b>	55	35

## Assessment Pattern for MSc Medical Courses (2019 Onwards)

### 1. LETTER GRADES AND GRADE POINTS:

MGMIHS has adopted the UGC recommended system of awarding grades and CGPA under Choice Based Credit Semester System for MSc Medical courses.

1. MGMIHS would be following the absolute grading system, where the marks are compounded to grades based on pre-determined class intervals.
2. The UGC recommended 10-point grading system with the following letter grades will be followed:

**Table 1: Grades and Grade Points**

Letter Grade	Grade Point
O (Outstanding)	10
A+ ( Excellent)	9
A (Very Good)	8
B (Good)	7
C (Above Average)	6
F (Fail)/ RA (Reappear)	0
Ab ( Absent)	0
Not Completed (NC)	0
RC (<50% in attendance or in Internal Assessment)	

- a. A student obtaining Grade RA shall be considered failed and will be required to reappear in the examination.
- b. Candidates with NC grading are those detained in a course (s); while RC indicate student not fulfilling the minimum criteria for academic progress or less than 50% in attendance or less than 50% in internal assessments (IA). Registrations of such students for the respective courses shall be treated as cancelled. If the course is a core course, the candidate has to re-register and repeat the course when it is offered next time.
- c. **CBCS Grading System - Marks Equivalence Table**

**Table 2: Grades and Grade Points**

Letter Grade	Grade Point	% of Marks
O (Outstanding)	10	86-100
A+ (Excellent)	9	70-85
A (Very Good)	8	60 -69
B (Good)	7	55 -59
C (Above Average) – <b>Pass both for UG and PGs</b>	6	50- 54
F (Fail) )/ RA (Reappear)	0	Less than 50
Ab (Absent)	0	-
NC- not completed	0	-
RC- Repeat the Course	0	0

**Table 3: Cumulative Grades and Grade Points**

Letter Grade	Grade Point	CGPA
O (Outstanding)	10	9.01 - 10.00
A+ ( Excellent)	9	8.01 – 9.00
A (Very Good)	8	7.01 – 8.00
B (Good)	7	6.00 - 7.00
C (Above Average)	6	5.01 - 6.00

- d. Assessment of a Course:** Evaluation for a course shall be done on a continuous basis. Uniform procedure will be adopted under the CBCS to conduct continuous internal assessments (IA), followed by one end-semester university examination (ES) for each course.
- e.** Courses in programs wherein Theory and Lab are assessed jointly, the minimum passing head has to be 50% Grade each for theory and practical's separately. RA grade in any one of the components will amount to reappearing in both components. i.e. theory and practical.

## **2. Eligibility to appear for the end-semester examinations for a course includes:**

2.1 Candidates having  $\geq 75\%$  attendance and obtaining the minimum 35% in internal assessments in each course to qualify for appearing in the end-semester university examinations.

2.2 The students desirous of appearing for university examination shall submit the application form duly filled along with the prescribed examination fee.

2.3 Incomplete application forms or application forms submitted without prescribed fee or application form submitted after due date will be rejected and student shall not be allowed to appear for examination.

## **3. Passing Heads**

3.1 The minimum passing head shall be 50% in both Theory and practicals separately including the internal assessment.

3.2 Elective subjects – the minimum prescribed marks for a pass in elective subject should be 50%. The marks obtained in an elective subjects should be communicated to the university before the commencement of the university examination. ( From IIIrdSem Onwards)

## **4 Detention:**

A student not meeting any of the above criteria may be detained (NC) in that particular course for the semester. In the subsequent semester, such a candidate improve in all, including attendance and/or IA minimum to become eligible for the next end-semester examination.

5 The maximum duration for completing the course will be 6 years (minimum duration of course x 2) i.e.  $(3 \times 2) = 6$  years for PG Courses, failing which his/her registration will be cancelled. Full fees of entire course of three years may be liable to be paid by the students.

## **6 Carry over benefit:**

6.1 A candidate who fails in any two main subjects of previous semester shall be permitted to carry over those subjects to the next semester.

6.2 A candidate shall not be allowed to appear in the final semester examination unless the candidate has cleared all the previous semester examinations.

## **7 Grace Marks for PG Courses:**

No grace marks will be awarded for PG Exams.

## 8. University End-Semester Examination

**8.1** There will be one final university examination at the end of every semester.

**8.2** A candidate must have minimum 75% attendance (Irrespective of the type of absence) in theory and practical in each subject to be eligible for appearing the University examination.

**8.3** The Dean shall send to the university a certificate of completion of required attendance and other requirements of the applicant as prescribed by the university, two weeks before the date of commencement of the written examination.

**8.4** A candidate shall be eligible to sit for the examination only, if she / he has secured minimum 35% in internal assessment of that subject. The internal examinations will be conducted at college/ department level.

**8.5** Notwithstanding – anything in any examination, a deficiency of attendance at lectures or practical maximum to the extent of 10% - may be condoned by the Dean.

**8.6** If a candidate fails either in theory or in practical, he/ she have to re-appear for both.

**8.7** There shall be no provision of re- evaluation of answer sheets. Candidates may apply to the university following due procedure for recounting of theory marks in the Presence of the subject experts.

**8.8** Internal assessments shall be submitted by the Head of the Department to the university through the Dean MGMMC at least two weeks before commencement of University theory examination.

**8.9** Supplementary examination: There shall be no supplementary examination

**8.10** Re-Verification -There shall be provision of retotaling of the answer sheets, candidate shall be permitted to apply for recounting/retotaling of theory papers within 8 days from the date of declaration of results.

**8.11** Scheme of University Exam Theory PG Program: General structure / patterns for setting up question papers for Theory / Practical courses, their evaluation weightages for PG programs are given in the following tables.

**8.12** Theory Question Paper Pattern for Core Subjects in University Examinations (For 1<sup>st</sup> & 2<sup>nd</sup> Semester)

Under CBCS - 60Marks

Question Type	No. of Questions	Questions to be Answered	Questions X Marks	Total Marks
Brief Answer Questions	7	6	1X 10	60

**General Instructions (Theory):**

- A. Time duration of each Theory Paper will be of Three (3) Hrs .
- B. Total Marks of each Theory Paper will be 60 Marks

**8. 13 Practical Question Paper Pattern For University Examinations Under CBCS - 50 Marks**

<b>Exercise</b>	<b>Description</b>	<b>Marks</b>
Q No 1	Practical exercise – 1	1 x15=15 M
Q No 2	Station exercise	5x5M=25 M
Q No 3	VIVA	10 M
		<b>Total = 50 M</b>

**General Instructions (Practical):**

- A. All the students have to remain present at the examination center 15 minutes before the scheduled time for examination.
- B. Students have to carry with them certified journal, I-card or examination receipt, and other necessary requirements for examination.
- C. Candidate should not leave the practical hall without the permission of examiner.
- D. Use of calculator is allowed but the use of mobile phones is strictly prohibited.
- E. The candidate has to leave the laboratory only after the submission of all the answer sheets of the exercises performed.

**8.14 Internal examination pattern (Theory) : 30marks**

<b>Question type</b>	<b>No. of questions</b>	<b>Questions to be answered</b>	<b>Question X marks</b>	<b>Total marks</b>
<b>Brief Answer Questions</b>	4	3	1X10	30

**8.15 Breakup of theory IA calculation for 20 marks**

Internal exam (Department -30 Marks)	15 marks
Seminar	5 marks
	Total = 20 M

### 8.16 Internal Examination Pattern (Practical): 30 Marks

Practical Exercise	10marks
Station Exercise	10 marks
Viva	10 marks
Total practical	30 Marks

### 8.17 Breakup of practical IA calculation:

Internal exam ( Department -30 Marks)	15 marks
Journal	5 marks
	Total = 20 M

**Internal Assessment marks should be submitted to the university by respective departments at least 15 days prior to onset of university examination.**

**9. Submission of Protocol of Dissertation:** Students should undergo Online Course of Research Methodology ( MCI- PG) before submitting the protocol for their Dissertation.

# MGM Institute of Health Sciences, Navi Mumbai

## MGM MEDICAL COLLEGE

### Academic Year 2019 – 2020

#### Academic Calendar For M.Sc. (3 Years) Medical Courses

(Anatomy, Physiology, Biochemistry, Pharmacology, Microbiology)

SCHEDULE OF ACTIVITY	DATES
Commencement of First Semester	01.08.2019
Receipt of completed Eligibility forms at MGMIHS from Respective college without late fees	On or before 30.10.2019
Receipt of completed Eligibility forms at MGMIHS from Respective college with late fees (Only for new admission)	On or before 30.11.2019
Commencement of Internal Exam	3 <sup>rd</sup> Week of November 2019
Winter Vacation for Staff	16.10.2019 to 15.11.2019
Notification of First Semester University Examination	As per MGMIHS
Commencement of First Semester University Examination	1 Week of January 2020
Conclusion of respective semesters	Last week of January 2020
Declaration of final Result	As per MGMIHS
Commencement of Second Semester	1 <sup>st</sup> Week of February 2020
Commencement of Internal Examination	3 <sup>rd</sup> Week of April 2020
Allotment of Guide for Dissertation	On or Before 30 <sup>th</sup> April 2020
Notification of Second Semester University Examination	As per MGMIHS
Summer Vacation for staff	01.05.2020 to 10.06.2020
Commencement of Second Semester University Examination	1 Week of July 2020
Conclusion of Second Semester	15 July 2020
Declaration of final Result	As per MGMIHS
Commencement of Next Academic Session	16.07.2020

# MGM Institute of Health Sciences, Navi Mumbai

## MGM MEDICAL COLLEGE

### Academic Year 2019 – 2020

#### Academic Calendar For M.Sc. (3 Years) Medical Courses

(Anatomy, Physiology, Biochemistry, Pharmacology, Microbiology)

SCHEDULE OF ACTIVITY	DATES
Commencement of Third Semester	16.07.2020
Submission of Protocol for Scientific and Ethical Approval	14.08.2020
Commencement of Internal Exam	3 <sup>rd</sup> Week of November 2020
Winter Vacation for Staff	16.10.2020 to 15.11.2020
Notification of First and Third Semester University Examination	As per MGMIHS
Commencement of Third Semester University Examination	1 Week of January 2021
Conclusion of respective semesters	15 January 2021
Declaration of final Result	As per MGMIHS
Commencement of Fourth Semester	3 <sup>rd</sup> week of January 2021
Commencement of Internal Examination	2nd Week of April 2021
Notification of Fourth Semester University Examination	As per MGMIHS
Summer Vacation for staff	01.05.2021 to 10.06.2021
Commencement of Fourth Semester University Examination	3 <sup>rd</sup> Week of June 2021
Conclusion of Respective Semesters	30 June 2021
Declaration of final Result	As per MGMIHS
Commencement of Next Academic Section	1.07.2021

# MGM Institute of Health Sciences, Navi Mumbai

## MGM MEDICAL COLLEGE

### Academic Year 2019 – 2020

#### Academic Calendar For M.Sc. (3 Years) Medical Courses

(Anatomy, Physiology, Biochemistry, Pharmacology, Microbiology)

SCHEDULE OF ACTIVITY	DATES
Commencement of Fifth Semester	1.07.2021
Commencement of Internal Exam	3 <sup>rd</sup> Week of November 2021
Winter Vacation for Staff	16.10.2021 to 15.11.2021
Notification of First, Third and Fifth Semester University Examination	As per MGMIHS
Commencement of Fifth Semester University Examination	First Week of December 2021
Conclusion of Fifth semester	Second Week of December 2021
Declaration of final Result	As per MGMIHS
Commencement of Sixth Semester	16 December 2021
Submission of Dissertation	31 March 2022
Commencement of Internal Examination	2nd Week of April 2022
Notification of Fourth Semester University Examination	As per MGMIHS
Summer Vacation for staff	01.05.2022 to 10.06.2022
Commencement of Sixth Semester University Examination	1st June 2022
Conclusion of Respective Semesters	30 June 2022
Declaration of final Result	As per MGMIHS

<b>Total</b>	<b>60 hrs</b>

**List of Books recommended  
MSc- Medical Physiology**

	<b>Name of the books</b>	<b>Author/Editor</b>
<b>Semester III</b>	Textbook of Medical Physiology	Guyton & Hall
	Textbook of Physiology, Vols-1&2	A K Jain
	<u>Textbook of Medical Physiology</u>	<i>Indu Khurana</i>
	Manual of Practical Physiology	A K Jain
	Textbook of Practical Physiology	PAL G K
	<b>REFERENCE BOOKS</b>	<i>BEST &amp; TAYLOR'S Physiological Basis of Medical Practice</i>
Human Physiology: The Mechanisms Of Body Function		VANDER, A.J.
Review of Medical physiology		Ganong

## ***ELECTIVE CORE COURSE - I***

Name of the Programme	<b>M.Sc. Medical physiology</b>
Name of the Course	<b>Clinical Nutrition (Principles of Nutrition)</b>
<b>Teaching Objective</b>	To apprehend the candidate with: <ul style="list-style-type: none"> <li>• The basic concept of nutrition.</li> <li>• The importance of nutrients for the growth and maintenance of human body.</li> <li>• The nutrition through life cycle and the dietary guidelines during therapeutic conditions</li> </ul>
<b>Learning Outcomes</b>	After the course accomplishment the student will be able to: <ul style="list-style-type: none"> <li>• Discuss the role of nutrients for human health and certain disorders</li> <li>• Describe the different forms of nutrients and about the procurement and requirement of nutrients</li> </ul>

	<b>CORE ELECTIVE THEORY TOPICS (CLINICAL NUTRITION)</b>	<b>No. of Hours allotted</b>
		<b>60hrs</b>
1	<b>Basic Concepts of nutrition</b> Micro & macronutrients, food groups, Food pyramid, Balanced diet, BMI, BMR, TEE, IBW, Body composition, RDA	4
2	<b>Macronutrients: Carbohydrates, protein, Fat</b> Classification, Nutritional significance of Macronutrients, deficiency and toxicity Therapeutic significance of macronutrients	6
3	<b>Micronutrients: Vitamins and Minerals</b> Classification, Nutritional significance of Micronutrients Deficiency and toxicity	10

	Therapeutic significance of micronutrients	
4	<b>Nutrition through lifecycle:</b> Nutrition during pregnancy, lactation, infancy, toddler, preschooler, school going kids, adolescents, adults, elderly	12
5	<b>Functional Foods and Nutraceuticals in Health &amp; Disease:</b> History, Definition, Classification, Effects on human health and potential applications in risk reduction of diseases	4
6	<b>Therapeutic Nutrition:</b> Introduction, different types of hospital diets Dietary guidelines for febrile condition Dietary guidelines for GI disorders: diarrhea, constipation, peptic ulcer, ulcerative colitis Dietary guidelines for obese and underweight Dietary guidelines for diabetes Dietary guidelines for heart disease Dietary guidelines for renal and liver diseases	14
7.	<b>Sports Nutrition:</b> Evolution and growth of sports nutrition as a discipline, Anthropometric and physiological measurement Various techniques for measuring body composition, Work capacity, Physical fitness, Parameters of fitness, Fitness tests, Nutritional demands of sports and dietary recommendations	10
	<b>Total</b>	<b>60 hrs</b>

<b>Sr. No.</b>	<b>CORE ELECTIVE PRACTICAL TOPICS Clinical Nutrition</b>	<b>No. of Hours allotted 30hrs</b>
1	Anthropometric Assessments	3
2	Formation and use of 24 hour dietary recall	6
3	Food frequency table formation	3
4	Standardization of weight and measures	3
5.	Nutrition status assessment of children	3
6.	Nutrition status assessment of elderly people	3
7.	Nutritional status assessment of adults	3
8.	Physical fitness assessment	6
	<b>Total</b>	<b>30 hrs</b>

**List of the  
Books recommended for Clinical Nutrition**

<b>SR. No.</b>	<b>Name of Books for Clinical Nutrition</b>	<b>Name of Author</b>
1.	Krause's Food Nutrition and Diet Therapy, 13th Edition, W.B. Saunders Ltd. .(2000)	Mahan, L.K. and Escott-Stump,S
2.	Advanced Textbook On Food & Nutrition Vol. 1 & N (2nd Ed. Revised _ Enlarged) Bapp Co. 1985.	Swaminathan S.:
3.	Basic Nutrition And Diet Therapy (8th Edition)	Robinson

**ELECTIVE COURSE – II**

Name of the Programme	<b>M. SC MEDICAL PHYSIOLOGY</b>
Name of the Core Elective Course	<b>Neurophysiology ( Electro diagnosis)</b>
Course Objective (Teaching Objectives)	<b>To apprehend the candidate with: Neuro anatomy, Physiology of nerve &amp; muscle ,Bioelectric potentials &amp; conduction, effect of various current on nerve &amp; muscle applicable for neurological condition, Advanced Diagnostic Skills in Electrophysiology, Physiology of EEG &amp; Normal EEG patterns</b>
Course Outcomes (learning Objectives)	<b>After the course accomplishment the student will be able to: Neuro anatomy, Physiology of nerve &amp; muscle ,Bioelectric potentials &amp; conduction, effect of various current on nerve &amp; muscle applicable for neurological condition, Advanced Diagnostic Skills in Electrophysiology, Physiology of EEG &amp; Normal EEG patterns</b>

Topic No.	Topics and Details	No. of lectures
1	<ul style="list-style-type: none"> <li>• Neuroanatomy</li> <li>• Basic Physiology &amp; Physics</li> <li>• Nerve &amp; Muscle Physiology</li> <li>• Physiology of excitable tissues</li> <li>• Membrane potentials, Equilibrium potentials, Generator potentials</li> <li>• Electronic conduction, Action potentials, Action potential propagation</li> <li>• Neurotransmitter release, receptor binding, post synaptic potentials</li> </ul>	8
2	Basic Electro diagnosis: Use of various low frequency currents in Electro diagnosis – Faradic, Galvanic and Micro-currents. Strength-Duration curve, F-G Tests.	10
3	Advanced Diagnostic Skills in Electrophysiology: <ol style="list-style-type: none"> <li>a. Principles of application of EMG&amp; NCV</li> <li>b. Application of EMG&amp; NCV in Neurogenic and myogenic disorders</li> <li>c. Single fiber EMG</li> <li>d. Repetitive Nerve Stimulation</li> <li>e. Evoked Potentials: Brainstem, Auditory, Visual, Motor and Cognitive(Somatosensory Evoked Potentials)</li> </ol>	30
4	EEG - Neurological equipment- EEG machine, Physiology of EEG, normal and abnormal EEG patterns. Physiology of EEG. Normal EEG patterns- Adults & Children. Abnormal EEG patterns. Polysomnography.	6

5	Applied : Approach to a neurological case Common neurological problems Infections of central nervous system Epilepsies. Disorders of peripheral nerves and plexuses Disorders of Upper and lower motor neurons. Disorders of myoneural transmission. Disorders of skeletal muscle	6
<b>Total</b>		<b>60 hrs</b>

	<b>Practical Topic</b>	<b>No. of Hrs allotted for Practical</b>
1	Autonomic Function tests	3
2	Clinical examination of Sensory system	3
3	Clinical examination of Motor system	3
4	Visual Pathways & Visual reflexes	2
5.	Tests for hearing	2
6.	NCV- sensory nerve conduction studies -Motor nerve conduction studies	4
7.	Basic Electromyography EMG	4
8.	Brainstem auditory Evoked Potential (BAEP)	3
9.	Visual evoked Potential (VEP)	3
10.	Somatosensory Evoked Potentials (SSEP)	3
<b>Total</b>		<b>30</b>

#### **List of the Books recommended**

<b>Sr. No</b>	<b>Subject / Topic</b>	<b>Author/ Editor</b>	<b>Title of Book</b>	<b>Publisher</b>
1.	Neurology	U .K. Misra & J. Kolita	Clinical Neurophysiology	Elsevier
2.	Neurology	Jun kimura,4th Edition. (2014)	Electro diagnosis in disease of nerve and muscles. Principles and Practice;	Oxford University Press
3.	Neurology	Sydney Sunderland,	Nerve and nerve injury	Churchill living stone. (1st edition)
4.	Neurology	U. K. Misra	Clinical EEG	Elsevier

**ACADEMIC SYLLABUS FOR SEMESTER-IV**

Name of the Programme	<b>M. SC MEDICAL PHYSIOLOGY</b>
Name of the Course	<b>Physiology</b>

<b>Course Objective (Teaching Objectives)</b>	To teach basic physiological concepts related to Respiratory system, Cardiovascular system, Gastrointestinal system, Food & Nutrition
<b>Course Outcomes (learning Objectives)</b>	<ul style="list-style-type: none"> <li>• To understand the basic physiological concepts of Respiratory system</li> <li>• To understand the basic physiological concepts of Cardiovascular system</li> <li>• To understand the basic physiological concepts of Gastrointestinal system</li> <li>• To understand the basic physiological concepts of Food &amp; Nutrition</li> </ul>

<b>Unit no.</b>	<b>THEORY TOPICS</b>	<b>Hours allotted No. of- 45hrs</b>
I	<b>Respiratory System</b> <ol style="list-style-type: none"> <li>1. Physiological anatomy and functions of respiratory system</li> <li>2. Pulmonary ventilation</li> <li>3. Pulmonary circulation, pulmonary edema, pleural fluid</li> <li>4. Physical principles of gas exchange; diffusion of oxygen and carbon dioxide through the respiratory membrane</li> <li>5. Transport of oxygen and carbon dioxide in blood and tissue fluids</li> <li>6. Regulation of respiration</li> <li>7. Respiratory insufficiency - pathophysiology, diagnosis, oxygen therapy</li> <li>8. High altitude, Aviation and Space Physiology</li> <li>9. Physiology of deep sea diving and hyperbaric conditions</li> <li>10. Comparative and applied Physiology</li> <li>11. Recent advances</li> </ol>	<b>15 Hours</b>
	<b>Cardiovascular system</b> <ol style="list-style-type: none"> <li>1. Physiological anatomy and functions of Cardiovascular system</li> <li>2. Cardiac muscle: the heart as a pump and function &amp; properties of the heart muscles</li> <li>3. Cardiac cycle</li> <li>4. Rhythmical excitatory and conductive system of the heart</li> <li>5. The normal electrocardiogram</li> <li>6. Cardiac arrhythmias and electrocardiographic findings in cardiac and systemic</li> </ol>	<b>18 Hrs</b>

<p><b>II</b></p>	<p>disease</p> <ol style="list-style-type: none"> <li>7. Heart rate</li> <li>8. Overview of the circulation; medical biophysics of pressure, flow, and resistance</li> <li>9. Dynamics of blood and lymphatic flow: arterial and arteriolar circulation, capillary circulation, lymphatic circulation, venous circulation</li> <li>10. Cardiac output</li> <li>11. Blood pressure</li> <li>12. Cardiovascular regulatory mechanism</li> <li>13. Regional circulation: muscle blood flow, cutaneous circulation</li> <li>14. Coronary circulation</li> <li>15. Cardiovascular pathophysiology: Ischemic Heart Disease, Cardiac failure, Circulatory shock, valvular and congenital heart defects</li> <li>16. Comparative and applied Physiology</li> <li>17. Recent advances</li> </ol>	
<p><b>III</b></p>	<p><b>Gastrointestinal physiology</b></p> <ol style="list-style-type: none"> <li>1. General principles of gastrointestinal function - motility, nervous control, and splanchnic circulation</li> <li>2. Propulsion and mixing of food in the alimentary canal- deglutition, gastric emptying, Peristalsis</li> <li>3. Secretory functions of the alimentary tract – saliva gastric juice, pancreatic juice, bile, intestinal juice</li> <li>4. Digestion and absorption in the gastrointestinal tract</li> <li>5. Physiology of gastrointestinal disorders</li> <li>6. Comparative and applied Physiology</li> <li>7. Recent advances</li> </ol>	<p><b>7 Hrs</b></p>
<p><b>IV</b></p>	<p><b>Food &amp; Nutrition</b></p> <ol style="list-style-type: none"> <li>1. Energy metabolism, BMR</li> <li>2. Regulation of food intake</li> <li>3. Essential dietary components</li> <li>4. Concept of balance diet</li> <li>5. Malnutrition: Obesity and its implication, protein energy malnutrition, vitamin and mineral deficiencies</li> </ol>	<p><b>5 Hrs</b></p>
	<p style="text-align: center;"><b>Total</b></p>	<p><b>45 Hours</b></p>

<b>Unit no.</b>	<b>Tutorial Topics</b>	<b>Hours allotted No. of 15hrs</b>
1.	Mechanics of respiration	1
2.	Pulmonary ventilation	1
3.	Transport of O <sub>2</sub> & CO <sub>2</sub>	1
4.	Regulation of respiration	1
5.	High altitude & acclimatisation	1
6.	Cardiac impulse	1
7.	ECG & arrhythmias	1
8.	Cardiac output & its regulation	1
9.	Blood pressure & its regulation	1
10.	Regulation of CVS	1
11.	Shock	1
12.	Gastric secretion	1
13.	Liver-functions, bile secretion	1
14.	Gastrointestinal movements	1
15.	Energy metabolism, BMR, Regulation of food intake	1
	<b>Total</b>	<b>15hrs</b>

<b>PRACTICAL TOPICS</b>	<b>No. of Hours allotted 60hrs</b>
<b>Clinical Examination:</b> <ol style="list-style-type: none"> <li>1. Respiratory System</li> <li>2. Cardiovascular System</li> <li>3. Abdomen System</li> </ol>	<b>20 Hours</b>
<b>Human Experiments</b> <ol style="list-style-type: none"> <li>1. Stethography</li> <li>2. Spirometry</li> <li>3. ECG</li> <li>4. Cardiac efficiency tests</li> <li>5. PFT</li> <li>6. CPR / Basic life support / Artificial respiration</li> <li>7. Ergography</li> <li>8. PEFR</li> </ol>	<b>10 Hours</b>
<b>CVS Amphibian graphs</b> <ol style="list-style-type: none"> <li>1. Normal Cardiogram</li> <li>2. Vagus &amp; crescent stimulation</li> <li>3. Vagal Escape</li> <li>4. Properties of cardiac muscles</li> </ol>	<b>10 Hours</b>

5. Effect of Ach, Adr, Nicotine 6. Effect of ions Na <sup>+</sup> , K <sup>+</sup> Ca <sup>+</sup> on perfused frog's heart	
<b>Human Graphs &amp; Charts</b> 1. Pressure volume changes in left ventricle 2. BMI – WHR 3. Cardiac action potential 4. BMR 5. Balanced diet 6. Skin fold calliper	<b>8 Hours</b>
<b>Mammalian Graphs</b> 1. BP 2. Respiration 3. Intestinal movements 4. Perfusion of isolated heart – Langendorffs apparatus	<b>8 Hours</b>
<b>Practicals for food &amp; nutrition</b>	<b>4 Hours</b>
<b>Total</b>	<b>60 hrs</b>

#### List of Books recommended

#### MSc- Medical Physiology

	<b>Name of the books</b>	<b>Author/Editor</b>
<b>Semester IV</b>	Textbook of Medical Physiology	Guyton & Hall
	Textbook of Physiology, Vols-1&2	A K Jain
	<u>Textbook of Medical Physiology</u>	<i>Indu Khurana</i>
	Manual of Practical Physiology	A K Jain
	Textbook of Practical Physiology	PAL G K
	<b>REFERENCE BOOKS</b>	<i>BEST &amp; TAYLOR'S Physiological Basis of Medical Practice</i>
Human Physiology: The Mechanisms Of Body Function		VANDER, A.J.
Review of Medical physiology		Ganong

Name of the Programme	<b>M. SC MEDICAL PHYSIOLOGY</b>
Name of the Course	<b>BIOETHICS, BIOSAFETY, IPR &amp; TECHNOLOGY TRANSFER</b>

<b>Course objective</b>	<p>The students will gain structural knowledge on:</p> <ol style="list-style-type: none"> <li>1. To list the routes of exposure for a pathogen to a human being .</li> <li>2. To demonstrate and assess the proper use of PPE, best practices,biological containment, and be prepared to safely conduct research</li> <li>3. To identify the role of the Biosafety Professional inBiomedical Research Laboratories</li> <li>4. To appreciate the importance of assertion in interpersonal communication and beintroduced to some key assertion strategies</li> <li>5. To understand the interpersonal nature of giving feedback, receiving criticism and resolving conflicts.</li> <li>6. To establish attentive listening as an assertion strategy</li> </ol>
<b>Course outcomes</b>	<p>Students will learn to:</p> <ol style="list-style-type: none"> <li>1. Effectively manage the health and safety aspects of a biological laboratory.</li> <li>2. Give reliable, professional and informed advice and information to colleagues and managers.</li> <li>3. Help to ensure that their institution complies with relevant legislation, liaise effectively with enforcing authorities and be aware of the penalties for failing to comply.</li> <li>4. Build a context of understanding through communication.</li> <li>5. Mediate between other conflicting parties.</li> <li>6. Exhibit de-escalatory behaviors in situations of conflict.</li> <li>7. Demonstrate acknowledgment and validation of the feelings, opinions, andcontributions of others.</li> </ol>

Unit no.	Topics	Hours allotted 60hrs
1	<b>Ethics:</b> Benefits of Ethics, ELSI of Bioscience, recombinant therapeutic products for human health care, genetic modifications and food consumption, release of genetically engineered organisms, applications of human genetic rDNA research, human embryonic stem cell research.	15 hrs
2	<b>Patenting:</b> Patent and Trademark, Bioscience products and processes, Intellectual property rights, Plant breeders rights, trademarks, industrial designs, copyright biotechnology in developing countries. Biosafety and its implementation, Quality <i>control in</i> Biotechnology.	15 hrs
	<b>Introduction to quality assurance, accreditation &amp; SOP writing :</b> Concept of ISO standards and certification , National regulatory body for accreditation, Quality parameters, GMP & GLP, Standard operating procedures, Application of QA in field of genetics, Data management of clinical and testing laboratory	15 hrs
3	<b>Funding of biotech business</b> (Financing alternatives, funding, funding for Bioscience/ Medical Health Sector in India, Exit strategy, licensing strategies, valuation), support mechanisms for entrepreneurship (Bio-entrepreneurship efforts in India, difficulties in India experienced, organizations supporting growth, areas of scope, funding agencies in India, policy initiatives), Role of knowledge centers and R&D (knowledge centers like universities and research institutions, role of technology and up gradation)	15 hrs

Name of the Programme	<b>M. SC MEDICAL PHYSIOLOGY</b>
Name of the Course	<b>DISASTER MANAGEMENT AND MITIGATION RESOURCES</b>

<b>Course objective</b>	<p>The course will uplift about:</p> <ol style="list-style-type: none"> <li>1. Understand and appreciate the specific contributions of the Red Cross/Red Crescent movement to the practice and conceptual understanding of disaster management and humanitarian response and their significance in the current context.</li> <li>2. Recognize issues, debates and challenges arising from the nexus between paradigm of development and disasters.</li> <li>3. Critically evaluate disaster risk reduction and humanitarian response policy and practice from multiple perspectives.</li> <li>4. Respond to disaster risk reduction initiatives and disasters in an effective, humane and sustainable manner.</li> </ol>
<b>Course outcomes</b>	<p>At the successful completion of course the student will gain:</p> <ol style="list-style-type: none"> <li>1. knowledge and understanding of the disaster phenomenon, its different contextual aspects, impacts and public health consequences.</li> <li>2. Knowledge and understanding of the International Strategy for Disaster Reduction (UN-ISDR) and to increase skills and abilities for implementing the Disaster Risk Reduction (DRR) Strategy.</li> <li>3. Ensure skills and abilities to analyse potential effects of disasters and of the strategies and methods to deliver public health response to avert these effects.</li> </ol>

Unit no.	Topics	Hours allotted 60hrs
1	<b>Introduction:</b> Definition of Disaster, hazard, global and Indian scenario, general perspective, importance of study in human life, Direct and indirect effects of disasters, long term effects of disasters. Introduction to global warming and climate change.	<b>08 hrs</b>
2	<b>Natural Disaster and Manmade disasters:</b> Natural Disaster: Meaning and nature of natural disaster, Flood, Flash flood, drought, cloud burst, Earthquake, Landslides, Avalanches, Volcanic eruptions, Mudflow, Cyclone, Storm, Storm Surge, climate change, global warming, sea level rise, ozone depletion Manmade Disasters: Chemical, Industrial, Nuclear and Fire Hazards. Role of growing population and subsequent industrialization, urbanization and changing lifestyle of human beings in frequent occurrences of manmade disasters.	<b>15 hrs</b>
3	<b>Disaster Management, Policy and Administration:</b> Disaster management: meaning, concept, importance, objective of disaster management policy, disaster risks in India, Paradigm shift in disaster management. Policy and administration: Importance and principles of disaster management policies, command and co-ordination of in disaster management, rescue operations-how to start with and how to proceed in due course of time, study of flowchart showing the entire process.	<b>12 hrs</b>
4	<b>Financing Relief Measures:</b> Ways to raise finance for relief expenditure, role of government agencies and NGO's in this process, Legal aspects related to finance raising as well as overall management of disasters. Various NGO's and the works they have carried out in the past on the occurrence of various disasters, Ways to approach these teams. International relief aid agencies and their role in extreme events.	<b>13 hrs</b>
5	<b>Preventive and Mitigation Measures:</b> Pre-disaster, during disaster and post-disaster measures in some events in general structural mapping: Risk mapping, assessment and analysis, sea walls and embankments, Bio shield, shelters, early warning and communication Non Structural Mitigation: Community based disaster preparedness, risk transfer and risk financing, capacity development and training, awareness and education, contingency plans. Do's and don'ts in case of disasters and effective implementation of relief aids.	<b>12 hrs</b>

Name of the Programme	<b>M. SC MEDICAL PHYSIOLOGY</b>
Name of the Course	<b>HUMAN RIGHTS</b>

<b>Course objective</b>	<p>Students will comprehend on:</p> <ol style="list-style-type: none"> <li>1. A branch of public international law, and relevant juridical mechanisms at global as well as regional levels,</li> <li>2. Human rights as an object of study in history, philosophy and the social sciences, as well as a practical reality in national and international politics.</li> <li>3. Different forms of promoting and implementing human rights, domestically as well as on the international level.</li> <li>4. The role of human rights in contemporary issues relating to terrorism, religion, ethnicity, gender and development.</li> <li>5. Cholarly values such as transparency, impartiality, clarity, reliance and the importance of sound reasoning and empirical inference.</li> </ol>
<b>Course outcomes</b>	<p>Student will be able to virtue:</p> <ol style="list-style-type: none"> <li>1. identify, contextualise and use information about the human rights situation in a given country</li> <li>2. critically appraise source material, including cases from human rights committees and tribunals and reports and summary records from treaty bodies</li> <li>3. analyse a country's situation or an international situation in terms of human rights and formulate human rights-based initiatives and policies</li> <li>4. Promote human rights through legal as well as non-legal means.</li> <li>5. Participate in legal, political and other debates involving human rights in a knowledgeable and constructive way</li> </ol>

<b>Unit no.</b>	<b>Topics</b>	<b>Hours allotted 60hrs</b>
1	<i>Background:</i> Introduction, Meaning, Nature and Scope, Development of Human Rights, Theories of Rights, Types of Rights	<b>08 hrs</b>
2	<i>Human rights at various level :</i> Human Rights at Global Level UNO, Human Rights – UDHR 1948 – UN Conventions on Human Rights: International Covenant on civil and Political Rights 1966, International Convent on Economic, Social and Cultural Right, Racial Discrimination -1966 International, Instruments: U.N. Commission for Human Rights, European Convention on Human Rights.	<b>15 hrs</b>
3	<i>Human rights in India :</i> Development of Human Rights in India, Human Rights and the Constitution of India, Protection of Human Rights Act 1993- National Human Rights Commission, State Human Rights Commission, Composition Powers and Functions, National Commission for Minorities, SC/ST and Woman	<b>12 hrs</b>
4	<i>Human Rights Violations:</i> Human Rights Violations against Women, Human Rights Violations against Children, 35 Human Rights Violations against Minorities SC/ST and Trans-genders, Preventive Measures.	<b>13 hrs</b>
5	<i>Political issues:</i> Political Economic and Health Issues, Poverty, Unemployment, Corruption and Human Rights, Terrorism and Human Rights, Environment and Human Rights, Health and Human Rights	<b>12 hrs</b>

**Evaluation Pattern- MSc Medical Physiology ( Admission Batch 2019 Onwards)**

**Evaluation Pattern for III rd and IV th Semester Exam ( Core Subject )**

**Final Theory Marks will be 120 Marks (100 Marks University Theory Exam + 20 Marks Internal Assessment)**

**Theory Marks 100 ( Time 3 Hours)**

<b>Question Type</b>	<b>Marks Per Question</b>	<b>No. of Questions</b>	<b>Questions to be Answered</b>	<b>Questions X Marks</b>	<b>Total Marks</b>
<b>Brief Answer Questions</b>	10	11	10	10 X 10	100

**Practical Exam Pattern- Marks 100**

<b>Exercise</b>	<b>Description</b>	<b>Marks</b>
<b>Q No 1</b>	Practical exercise	2 x25=50 M
<b>Q No 2</b>	Station exercise	5x5M=25 M
<b>Q No 3</b>	VIVA	25 M
		Total = 100 M

## Internal Examination ( Mid-Semester Exam)

**Theory Marks 50 ( Time 1 1/2 Hours)**

Question Type	Marks Per Question	No. of Questions	Questions to be Answered	Questions X Marks	Total Marks
Brief Answer Questions	10	6	5	5 X 10	50

**Practical Marks 50**

Exercise	Description	Marks
Q No 1	Practical exercise – 1	1 x25=25 M
Q No 2	Station exercise	5x2M=10 M
Q No 3	VIVA	15 M
		Total = 50 M

## For Calculation of Internal Assessment

**The Marks obtained in Internal Examination out of 50 will be converted to out of 20 for Theory and Practical Internal Assessment.**

## **Evaluation Pattern for III rd and IV th Semester Exam ( Elective Subjects & PG Activity )**

### **Elective Subjects**

- III rd Semester students have a choice to select one Core Elective Subject out of the two as mentioned above; for which there will be Internal Evaluation exam for Theory and Practical.
- IV th Semester students have a choice to select one General Elective Subject out of the three mentioned above; for which there will be Internal Evaluation exam for Theory.

#### **Evaluation Pattern for Elective Subject (Theory)- Time 3 Hrs**

<b>Section</b>	<b>Question</b>	<b>Marks Distribution</b>	<b>Marks Alloted per section</b>	<b>Marks</b>
<b>Section A</b>	MCQ	10 X 1 M=10	10	10
<b>Section B</b>	SAQ	3/4 X 5 M= 15	15	35
	LAQ	2/3 X10 M= 20	20	
<b>Section C</b>	SAQ	3/4 X 5 M= 15	15	35
	LAQ	2/3 X10 M= 20	20	
				Total 80

#### **Practical Exam Pattern**

<b>Excercise</b>	<b>Discription</b>	<b>Marks</b>
<b>Q 1</b>	<b>Practical Excercise</b>	1 X 20 = 20 M
<b>Q 2</b>	<b>Station Excercise</b>	2 X 5 = 10 M
<b>Q 3</b>	<b>Viva</b>	10 M
	<b>Journal</b>	10 M
		Total = 50 M

## PG Activities

- The record of Clinical Postings, Dissertation/ Project/ Seminars will be maintained in Logbook. Each of the activity will be evaluated as per the evaluation format given in the Logbook and will be signed by the Departmental Co-ordinator before Semester end Examination.

### Allotment of Marks for PG Activities

PG Activity	Marks Alloted
Clinical & Sectional Postings	20
Seminars/ Journal Clubs	20
Dissertation/ Project Work	20

**The Marks obtained in the Internal Assessment, Elective Subjects and PG Activities to be sent to MGMIHS before the Semester End Examination as per the date announced by the university.**
